SKILLS

- Graphic Design :Proficient in Adobe Photoshop and Illustrator, with experience in creating logos, banners, and photo manipulation.
- Programming: Skilled in C, C++, Java, HTML, CSS, and Python.
- Quick Learner: Able to grasp new concepts and technologies rapidly.
- Research: Strong ability to conduct thorough internet research for various topics.

PROJECTS

- **PDF Reader and Chatbot Integration Web App (Team Project):**
 - Collaborated with a team to develop a web application designed for students to read PDF files.
 - Integrated a chatbot to provide answers to user questions based on the content of uploaded files.
 - Programmed functionalities to answer questions directly from the web app when the chatbot couldn't provide a response.
- **Farmer's Business Web App (Team Project):**
 - Contributed to the creation of a web app designed to support farmers' businesses.
 - Implemented features to assist farmers in managing and growing their agricultural enterprises.
- **Chat Room (Team Project)**
 - Collaborated as a front-end designer to create a chat room platform during a hackathon project.
 - Designed the user interface using Figma, creating visual mockups and prototypes for the front-end.
 - Translated Figma designs into the actual front-end elements to enhance user experience.
